

### Recommendation Letter

Air Company SCAT confirms that from 2009 has selected Avia Solution Group including its subsidiary FL Technics located at Vilnius International Airport, as strategic partner on wide range of integrated airworthiness solutions.

From the beginning of cooperation FL Technics and other subsidiaries of Avia Solution Group established a reputation as reliable and professional partners capable to provide us whole required range of services as single integrated "one-stop-shop" solution:

- Avia Asset Management developed optimal flight network, found suitable A/C type for optimal itineraries and provided 5 (five) such aircrafts to SCAT on terms of leasing.
- Baltic Aviation Academy provided line and base training for optimal quantity of pilots and cabin crews (for selected A/C Type)
- FL Technics prepared and launched line station in base airports of SCAT Air Company and constantly provides such services as engineering support, line and base maintenance, spare parts and components supply, engine maintenance management of aircraft operated by SCAT.

Air Company SCAT is ready to confirm that using of FL Technics maintenance management is an optimal combination of cost-effective solutions and excellent technical quality of provided services. During the period of our cooperation FL Technics team shows that it is capable to provide solutions for whole range of MRO challenges right up to engine fleet maintenance management programs from optimal selection of overhaul provider and creating workscope till detailed checking of final Shop Visit invoice and providing such important services as sub-leased spare engine on the period of overhaul, engine "on-wing" change at Vilnius International Airport.
